Please read all Information below before Installation

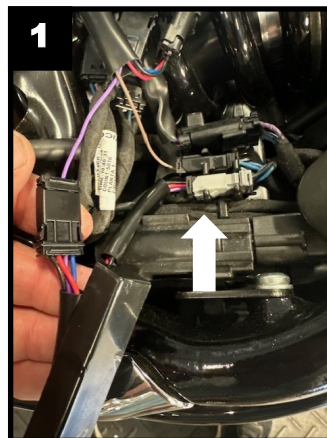

Warning: Disconnect negative battery cable from battery; refer to owner's manual. Failure to do so may result in electrical shock, injury, or fire. Secure negative battery cable away from positive side of battery and all other positive voltage sources on motorcycle.

Safety First: Always wear appropriate safety gear including safety glasses when performing any electrical work. It is highly recommended that safety glasses be worn throughout this installation process. Be sure motorcycle is on level surface, secure and cool.

Installation:

1. Disconnect the negative battery cable from the battery and remove the seat.
2. Plug the 25ST Run Load Harness inline at the turn signal connector under the seat. Shown in **Figure 1**.

3. Reconnect the negative battery cable to the battery and reinstall the seat.
4. Test the headlight and turn signals for proper operation and check for DTCs (Diagnostic Trouble Codes).
