ATTENTION

Please read all Information below before Installation

Important: Units must be properly aimed such that the beam pattern cut off line complies with applicable regulations. It is recommended a professional service provider or qualified dealer perform the necessary adjustments for proper aiming.

Warning: To prevent possible electrical shock, disconnect the negative Battery terminal before installing this product.

Installation:

1. Disconnect the negative battery cable from the battery.
2. Review detailed service manual for instructions on replacing factory passing lamp bulbs.
3. Remove the factory passing lamps from motorcycle.
4. Connect the passing lamps to the existing factory Connectors. Note the polarity designations on the passing lamp connector and connect to the motorcycle accordingly. Shown in **Figure 1**. **Note: 2004 and earlier models require adaptor CDTB-PLA for plug and play capability (sold separately).**
5. Reassemble passing lamp per the instructions in detailed factory service manual. Make sure no wiring is cut, frayed or pinched.
6. Reconnect the battery negative cable to the battery.
7. Test the Custom Dynamics® 4.5" LED Passing Lamps for proper operation.
